This appears to be fine as an interim plan. There are details that we probably need to discuss with our ops people.. After a baseline is establish after land fall (and I'm no longer sure exactly what that is) Region 4's long term plan would be to eliminate the need for the TAGAs thru BP's contractor taking over the air monitoring program except for the state owned fixed sites. EPA would conduct oversight of sampling and evaluation of their laboratories, much like we do on other PRP jobs.

---

Gentlemen,

Please take a look at the proposed plan for the long haul regarding the TAGA(s) deployment for the current oil spill. Please peruse and comment.

I would like to have a conference call tomorrow (short!) to discuss to sure both Regions are comfortable with the proposed plan.

Shane, i know your busy with the oil spill and the floods, is there's someone that could speak on your behalf, please let me know.

Proposed Conference Call Times:

May 11th 2010 Eastern Time

8:30 AM

10:30 AM

3:00 PM
